## XJ-900 GRAPHITE

Are you looking for control and touch in your game?!?! Well, the Graphite XJ-900 WideBody paddle is the answer. It's made with a high performance grade Graphite skin and Polymer core that brings an extra level of control to your game. The paddle plays a little softer so you have more feel while hitting those dinks or third shots. The Graphite XJ-900 WideBody is the newest paddle that TOPP Pickleball, Inc. offers. Great for all levels!

Length 15.50"  
Width 8.375"  
Grip 4.25-4.5"  
Handle 5.0"  
Wt 7.6-7.9oz

See my review of the Composite WideBODY XJ-900. The graphite skin on Topp's newest model provides an extra degree of feel and touch at the net, without sacrificing crispness and power. Again, Topp uses high quality materials and design, and at \$100.00, this graphite paddle represents a superior value that will grow with you as your game develops. The people behind Topp know the game well and are extremely active in promoting the benefits of our sport to young and old alike. Check out their website.
