

ENGAGE PICKLEBALL

POACH ICON

The NEW Poach Icon is a paddle that will take you to new heights. Combining the technically advanced Core of the Poach Advantage with the proprietary 'chemically bonded' skin of the Elite Pro. Two of the top selling paddles in the market come together.

By placing the best selling Elite Pro skin on the Poach Advantage core, you get a paddle that is extremely soft and provides ultimate control with a firmer solid hitting surface with a huge sweet spot. Along with providing the roughest hitting surface of any paddle, which is a trademark of the proprietary 'chemically-bonded' skin of the Elite Pro. The Poach Advantage is a very soft playing paddle. If you love the way it feels, but want a more solid / harder hitting surface and rough textured skin, the Poach Icon is for you. On the flip side. You love the Elite Pro but would like a softer feel providing even more control over the ball. The Poach Icon would be

Core: Proprietary Polymer Composite (Control Pro 'Black' Technology)

Skin: Cutting-Edge 'Chemical Bond' (for maximum forgiveness)

Weight: 7.5 - 8.3 oz

Size: 16" long x 8" wide

Grip Circumference: 4 1/4"

Grip Length: 5"

Many of our members use now, or have used the Elite Pro or the Poach in the past. This is highly sought after variation of those two. I will post a short review soon, as weather dictates, but if you're familiar with the Elite Pro or the Poach...you may want to give this a ride.
