

ONIX

VOYAGER PRO

Inspired by the ONIX Voyager, the all-new Voyager Pro takes control to unprecedented levels. The premium-coated graphite face and the precision-cut polypropylene retains the touch of the original Voyager, but the thicker core material increases the control for the shots. By not increasing the weight, the paddle (7.8-8.2 oz.) generates impressive speed and power for baseline shots. The Wide Body paddle offers the largest sweet spot for better touch. This calculated construction allows players to put the perfect spin and torque on the ball play after play.

I haven't tested the Voyager Pro yet, but it is one of Onix's most popular paddles for the competitive player, and one you'll currently see in many Anthem player's hands. It has the largest sweet spot in the Onix roster and a thicker core for better control. Talk to Dave if you'd like to play test this model.
