TANTRUM V

The Tantrum V is for the player who wants extra power in a medium weight paddle. Great for singles. Made with a honeycomb polymer core and fiberglass face with a vinyl and poly-carbonate finish. The Tantrum V's rounded shape creates a larger sweet spot than traditional square shaped paddles..

Length 16.25"

Width 7.5"

Grip 4.25"

Handle 4.75"

Lt Wt 7.3-7.5 oz

Hvy Wt 7.6-7.8 oz

The Tantrum V sports the same dimensions as the GXT, and the same honeycomb polymer core. The difference between the two models is the fiberglass face the V uses, rather than graphite. I have been a loyal "graphite" proponent for some time now, so you can imagine my surprise when I found the V's playability, both from a power and from a touch perspective, to be superb. The paddle is extremely well balanced with a satisfying, solid feel on both ground strokes and volleys. Off center hits produce decent results, and unless you hit an actual edge shot, it is a very stable, forgiving weapon. It comes in two weight classes.....light and medium.
