

ONIX

EVOKE PRO

"This paddle has the right amount of power and control." - Randy Zbinden, Team ONIX Pro Player, on the Evoke Pro.

Co-designed by Team Onix professional players, the Onix Evoke Pro was created with a specific weight and feel while producing maximum control and spin. Featuring a wide body shape, this pickleball paddle offers the largest sweet spot for better contact with the ball. The precision cut polypropylene core delivers incredible touch with a composite face providing better power and strength to shots.

The Evoke Pro is one of the most solid and well balanced Fiberglass/Polypropylene paddles on the market. I found it to be responsive on serves and drives, and easily maneuverable at the net. The Evoke Pro is one of Onix's premier offerings, and has been in their stable for quite some time. It features a very large sweet spot and a unique handle which mimics the shape and feel of a table tennis paddle. If you'd like to play test this model, talk to Dave Furman.
