

TMPR SPORTS

TANTRUM T3

The Tantrum T3 features the dynamically versatile TMPR Tri-Core. Made with 3 layers of surface material on a honeycomb polymer core, it provides vibration dampening on your soft shots, yet more power at hard impact due to its increased density. The Tantrum T3 is a medium to heavy weight paddle. It has a 4.5" handle length and 4.25" handle circumference. The Tantrum T3's rounded shape creates a larger sweet spot than traditional square shaped paddles.

Length 16.25"

Width 7.75"

Grip 4.25"

Handle 4.5"

Med Wt 7.7-7.9oz

Hvy Wt 8.0-8.3oz

TMPR Sports is a new entry into the world of high quality, high tech paddles. They offer 3 models in their Tantrum series, the T3, the GXT, and the V. All 3 sport a very innovative, aerodynamic shape, slightly elongated with softly curved corners. The shape is highly responsive, with very little drag, designed to easily control shot direction. The T3 provided substantial pop and power from the baseline. I found it very stable on blocks and drives at the net, with decent feel and directional control on dinks. It comes in medium to heavy weights and definitely targets the more aggressive player.
