

ONIX

Z5

"It has enough touch and pop, and it's very, very durable." - Tyler Loong, Team ONIX Pro Player, on the Graphite Z5.

The Onix Z5 Graphite is the most popular paddle in the Onix line because of its outstanding touch and ball control while still delivering concentrated power in a medium-weight design for all-around performance.

The Z5 has been around for quite some time and is a fun paddle to use. I found it to be extremely powerful from the baseline, and quite efficient at knocking off putaway drives from the kitchen line with very little effort. It features a Nomex core, which transfers maximum power back into the ball on impact, and a soft, responsive Graphite face. It continues to be one of the most popular paddles on the market for players looking for maximum power and pop. Talk to Dave about your style of play and he can tell you whether the Z5, or another Onix model, might be for you.
