## INVIKTA AMPED

The AMPED series is pioneering an entirely new technology in the Pickleball industry with its FiberFlex Fiberglass face and patent pending thicker X5 polypropylene core. The revolutionary thicker paddle core provides an unparalleled degree of power and control along with many other performance benefits!

This paddle is available in lightweight (7.3-7.8 oz) and mid weight (7.9-8.3 oz) options. It features a 5.25" handle and a slightly longer and narrower paddle face.

It is favored by players with experience in racquetball, table tennis, and squash and is a good choice for beginner and intermediate players.

This is the paddle that Tyson McGuffin has used on his rise to Number #1 singles player in the world, and for good reason. Its slightly elongated shape is easy to control and provides that extra measure of power to end rallies at the net and to keep opponents stuck at the baseline. On dinks, it adds extra reach that can be the difference between an unattackable dink and a sitting duck. The thicker "AMPED" core enhances its overall versatility. If you are looking for a paddle with extra power and reach, that can keep your opponents off balance, this is a paddle that deserves your attention.
