

ONIX

OUTBREAK

Stronger. Faster. Precise.
Just like you will be when you try the all-new ONIX Outbreak. The newest pickleball paddle from Onix features a graphite face reinforced by TeXtreme® Technology for better touch and control without adding weight. Found in pro tennis rackets, hockey sticks, and record breaking aero helmets, TeXtreme® Spread Tow woven carbon fiber fabrics increase stiffness and strength without adding weight thereby giving players pinpoint control on their shots. The Outbreak's medium weight (7.8 – 8.2 oz.) provides the perfect weight and feel for maximum control and spin. The polypropylene core features an increased thickness for better touch to absorb shock while still delivering baseline power. Featuring a wide body shape, the Outbreak (15 1/2" x 8 1/8") offers increased paddle size and the largest sweet spot. Experience Onix's newest paddle reinforced by TeXtreme® Technology, because winning is fun.

I play tested the Outbreak at a recent Demo Day sponsored by Onix and hosted by Dave Furman. The paddle has great balance and feel, making the difficult mission of hitting consistent third shot drops and winning dinking battles at the net just that much easier. The unique graphite face design was helpful in controlling direction and adding additional spin to your shots. Definitely worth a try! Talk to Dave.
