TANTRUM GXT

The Tantrum GXT is a high-performance paddle for the player who wants extra control at the net. Made with an omni-directional graphite face and honeycomb polymer core, the Tantrum GXT is a medium weight paddle with an extra-soft touch. It has a 4.75" handle length and 4.25" handle circumference. The Tantrum GXT's rounded shape creates a larger sweet spot than traditional square shaped paddles.

Length: 16.25"

Width: 7.5"

Handle length: 4.75"

Grip Circumference: 4.25"

Medium Weight: 7.6 to 7.8 Oz.

The GXT sports the signature Tantrum shape. It provides a softer feel at the net and not quite as much power from the baseline as the T3 and V. If you are familiar with the more touchy-feely paddles, like the Paddletek Tempest and Onix Outbreak....you get the idea. If you're a control freak, and get excited about "dropping the ball on a dime" you'll like the GXT. I found the GXT to be quiet and easy on the arm and adept at taking speed off power shots when trying to reset the point. The sleek shape made it easier to get the paddle back into ready position, and performed well when trying to take control of a net drive battle.
